

A scatter plot illustrating the relationship between the Human kinase family score (X-axis) and an unlabeled Y-axis. The X-axis ranges from 1.0 to 3.0, and the Y-axis ranges from 0.0 to 1.0. A positive linear regression line is shown, indicating a positive correlation. The data points are represented by black circles. The plot shows a dense cluster of points at lower scores (around 1.0 to 1.5) and a few outliers at higher scores (around 2.0 to 3.0).
